OBJECTIVE

Final-year Computer Science Engineering student seeking a Frontend Developer role in a reputed company. Proficient in HTML, CSS, JavaScript, and modern frontend frameworks. Eager to contribute to innovative web projects and grow as a skilled professional in the tech industry.

PROJECTS

Hostel Management System | HTML, CSS, JavaScript, PHP, MySQL

- Designed and developed a web application to manage student records, room allocation, rent tracking, and hostel complaints.
- Built responsive user interfaces for both admin and student portals using HTML, CSS, and JavaScript.
- Implemented backend functionalities with PHP and MySQL for secure data handling and dynamic content management.

Mango Leaf Disease Prediction | Python, ResNet50, CNN

- Created a machine learning web app to detect mango leaf diseases using image classification.
- Achieved 92% accuracy with transfer learning using ResNet50 architecture.
- Developed a real-time prediction UI with image upload and treatment suggestions.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

AJ Institute of Engineering and Technology, Mangalore 2022 – 2026 | CGPA: 8.0

Pre-University Course (PUC) - PCMB

Government Junior College, Byndooru 2020 – 2022 | Percentage: 82%
